

## 168 DAYS...AN AMAZING ACCOMPLISHMENT

Dancor Development Corporation began construction of a 266,500 square foot facility located on Robin's Hill Road, near the Airport, on June 15th, 2007. We are very happy to announce the completion of this amazing building. A project of this size and complexity would normally take 8 to 10 months. This building was completed in just 168 days!

This new warehouse facility is an important addition to the growing industrial inventory in the City of London. Dancor, a Brampton based development and construction firm, is pleased to announce the development and construction of two new facilities which are planned for Spring 2008 on Robin's Hill Road. The two new facilities will consist of approximately 30,000 square foot building, divisible into 3 units, and a 55,000 square foot building divisible into 5,000 square foot units.

Dancor has enjoyed the entire development and construction experience in the City of London and has plans to develop and build in the City for many years to come. London is a great City and has a wonderful business atmosphere.

We want to thank especially the City of London, the London Economic Development Corporation, and the People of London for a tremendous experience.

This amazing accomplishment of completing this new building in just 168 days is the result of many great partnerships. First and foremost, the London Economic Development Corporation made it possible for Dancor to see the amazing opportunities London has to offer. The City of London staff, each and every department, made sure that we could start building as soon as possible in order to meet the very tight schedule.

The designers and trades who worked so hard, and so many long hours and weekends, made the project happen, on budget and on time.

Dancor is grateful to everyone who has helped make this project possible. Thank you to all who made this facility a reality and a beautiful addition to a great and wonderful City.

## Our Sincere Appreciation and Thanks To,
