

Senior Web Developer (Canadian CTO)

The Company

Factory Bucket started out helping a handful of discrete small-medium size manufacturers upgrade their websites, advertise online and most importantly adopt the latest technology/software to run their operations. Over several years helping dozens of manufacturers it was clear the clunky, out-dated software in manufacturing plants today leave plenty to be desired. Factory Bucket was born from a need to serve manufacturers and provide them with software tools that were configurable to their operation, low cost and super user-friendly.

We've already saved manufacturers hundreds of thousands of hours in paperwork and manual tasks and we've barely scratched the surface.

The Opportunity

As a Senior Web Developer at Factory Bucket, you will help us in our quest to simplify and expedite manufacturing industry processes by applying your passion for technology and business. This role will enable you to have both technical and business-minded approach to architect, implement and evolve our frontend and backend systems as part of a team comprising of like-minded peers.

As a senior web developer, you will have a great influence on our end product. You will get to know the processes of how our customers see and use them so that you can create solutions to help them. By virtue of your creative solutions, you will help us towards the direction of achieving our vision.

The Position

Writing application code for our core product as well as related products including but not limited to APIs and SDKs.

Designing and architecting new modules as well as maintaining existing ones.

Advocating best practices for development and testing

Working with the team across the globe

Be a mentor for junior developers and promote skill growth

The Ideal Candidate

Sound knowledge of object-oriented PHP skills

Strong understanding of architecting solutions with MVC framework (we use Laravel)

Experience with front end frameworks is a plus

Proven competencies in SQL and data storage (we use MySQL and Azure Storage)

Ability to conduct code reviews, quickly debug the application and a general understanding of various coding standards and design patterns.

Proven ability to lead, motivate and mentor

The Process

Interested applicants please send resumes and cover letters to hello@factorybucket.com with "Canadian CTO - *Your Name*" in the subject line.

Thanks to all whom apply.

Intermediate Web Developer

The Company

Factory Bucket started out helping a handful of discrete small-medium size manufacturers upgrade their websites, advertise online and most importantly adopt the latest technology/software to run their operations. Over several years helping dozens of manufacturers it was clear the clunky, out-dated software in manufacturing plants today leave plenty to be desired. Factory Bucket was born from a need to serve manufacturers and provide them with software tools that were configurable to their operation, low cost and super user-friendly.

We've already saved manufacturers hundreds of thousands of hours in paperwork and manual tasks and we've barely scratched the surface.

The Opportunity

As an intermediate web developer, you will be a part of Factory Bucket's global team. You will primarily work on implementing new features as well as maintaining the new ones. You will closely work with our senior web developers to ship features out.

The Position

Writing application code for our core product as well as related products including but not limited to APIs and SDKs.

Advocating and following best practices for coding and debugging

Working with the team across the globe

The Ideal Candidate

Sound knowledge of object-oriented PHP skills

Strong understanding of MVC architecture (we use Laravel)

Proven competencies in SQL and data storage (we use MySQL and Azure Storage)

Ability to quickly debug the application and a general understanding of various coding standards and design patterns.

Experience with version control tools (we use GIT)

The Process

Interested applicants please send resumes and cover letters to hello@factorybucket.com with "Canadian CTO - *Your Name*" in the subject line.

Thanks to all whom apply.
