

Why Health Companies Choose London

- The London, Canada, Life Sciences sector includes biotech/ pharma/ medical devices/ manufacturing/ packaging/ research/ testing/ labs/ digital health.
- There are financial incentives for targeted job-creating investment projects from the federal and provincial governments that are NOT available in the Toronto area.
- Fully serviced land for development is available at excellent highway locations and is very inexpensive relative to Toronto. There are no development charges for specific targeted uses (manufacturing, production, etc.).
- Large university with a medical school, a dental school, a well-regarded business school, a full range of PhD and professional programs.
- Two teaching hospitals which cover the entire region.
- Two medical research facilities (2000 researchers) partnered with the hospitals and the University.
- London's research excellence includes Musculoskeletal and Brain Health, Bio-Medical Devices and Advanced Simulation, and Bio-Medical Imaging
- 25,000 people working in the health sector including many HQP from the University and College.
- Canada's immigration programs offer easy paths for top international talent. London can attract HQP from all over the world.
- Our talent is much less expensive than the Toronto area due to an overall lower cost of living and doing business.
- A large College with R&D capabilities, labs, and health programs graduating nursing, laboratory and clinical trials talent.
- Clinical Trials companies focused on drugs, GI, medical devices, cannabis, and wellness.
- Canada's generous R&D and Talent development incentives.
